

DJ 308 e DJ 310, caratterizzati dall'elevata dinamica, sono il complemento ideale per le sorgenti digitali. La guida d'onda anteriore del tweeter domHorn fornisce l'ottima dispersione polare, insieme all'elevata efficienza. La camera di risonanza posteriore e la cupola in seta trattata garantiscono la grande velocità dei transienti, la buona dinamica e le alte frequenze cristalline.
